

☒ **AFTER EVERY SHOWER (under 2 minutes)**

- ☐ **Squeegee** the walls and glass door — removes the standing water mold needs 30 sec
- ☐ **Run the exhaust fan** during the shower + 20–30 minutes after (use a timer switch) auto
- ☐ **Leave the door/curtain open** — stretch the curtain flat so folds can dry 5 sec
- ☐ **Hang loofahs & cloths outside the stall** — nothing wet stays in the shower 10 sec

 ONCE A WEEK

- ☐ **Vinegar mist:** spray the whole shower with white vinegar — no scrubbing, no rinsing, just walk away 1 min
- ☐ **Wipe the caulk lines** and check for any new dark spots (catch mold early) 2 min
- ☐ **Rinse shampoo bottles** and the soap dish — soap residue is mold food 1 min

1 ONCE A MONTH		
☐	Deep-clean grout lines with 3% hydrogen peroxide (30 min dwell, scrub, rinse, dry)	45 min
☐	Clean the glass door track with vinegar + toothbrush	10 min
☐	Clear the drain: remove hair, then baking soda + vinegar flush with hot water	15 min
☐	Wash the shower curtain (machine + 1 cup vinegar); liners every other month	5 min
☐	Check humidity: should read under 50% an hour after showering (hygrometer)	1 min

 ONCE A YEAR

- ☐ **Reseal the grout** with a penetrating grout sealer (clean first, dry 24 hrs) 1–2 hrs
- ☐ **Inspect & replace failing caulk** — any caulk that re-stains within a week of cleaning 1 hr
- ☐ **Clean the exhaust fan grille & duct** — a dusty fan moves almost no air 30 min
- ☐ **Check for slow leaks** under the sink, around the shower valve and pan 15 min
